

SARA – Now also with 1.0"x1.0" LaBr₃(Ce) detector

Dear Madam, dear Sir,

The SARA series is the successful solution for gamma spectroscopic environmental radiation monitoring. It already provides different detector sizes and materials to provide the optimum solution for the user. With the selection of the best detector for the application the user obtains the optimum combination of sensitivity, resolution and costs. [Further information](#)

Introducing the **SARA IGS930 with a 1.0"x1.0" LaBr₃(Ce)** detector ENVINET GmbH provides an attractive version of a spectroscopic gamma probe with **good energy resolution (more than two times better than NaI(Tl)) and adequate sensitivity**. It extends the SARA product line of LaBr₃(Ce) detectors. ENVINET GmbH provides now three different versions of LaBr₃(Ce) detectors:

- IGS910 – 1.5"x1.5" LaBr₃(Ce)
- IGS920 – 2.0"x2.0" LaBr₃(Ce)
- IGS930 – 1.0"x1.0" LaBr₃(Ce)

For more details see the [data sheet](#).

If you have any questions, please do not hesitate to contact us at any time by email info@envinet.com or by phone +49 89 45 66 57-0.

Best regards
Your

ENVINET Team

ENVINET has 30 years of experience in implementing turnkey early warning systems and is a leading manufacturer of networks for the monitoring of the radiation level in the environment. Reflecting the experience and innovative capability of the team, ENVINET products and solutions guarantee premium quality and maximum reliability, while offering highly functional solutions.
